China Strategy

2011 Outlook: A Year of Re-rating

Several bullish themes for Chinese equities in 2011:

- 1) Cheap valuation, humble relative performance in 2010, and mild consensus outlook.
- 2) Solid earnings growth outlook supported by expansive fiscal policies. Upside risk in large-caps.
- 3) Contained inflation risk with stable monetary policies and moderate tightening.
- 4) Strong currency, still ample global liquidity environment, good risk appetite.

Policy tone for 2011 – still pro-growth yet tackling

inflation risk: The just concluded Politburo Working Meeting set the tone for 2011 fiscal policies as “appropriately accommodative” (same as 2010); monetary policies shifted to “stable and healthy” (from “appropriately accommodative” in 2010). This implies a balance between remaining pro-growth and curbing inflation risk.

We think mild inflation should favor stocks in 2011:

This is contrary to the Street view, which we find overly concerned about inflation. Our economist, Qing Wang, forecasts inflation to peak by mid-2010 with a full-year reading at 4.5%. In this vision, stocks should rise with inflation stabilizing and peaking in 2011.

We favor high beta, deep value and cyclical plays:

Our favored industries are banks, property, insurance, steel, cement and energy. We underweight consumer stocks including durables, staples, auto and tech.

Loan quota is the key domestic risk for 2011:

An overly tight new loan quota would be a drag on economic growth and squeeze bank asset quality. A too-loose loan quota could fuel greater inflation and trigger aggressive tightening.

G3 growth is the key external risk: Surprisingly higher than expected growth in the G3 economies could drive oil, commodities and food prices even higher, followed by global inflation spillover. China would be forced into more aggressive tightening in that case.

Year-End 2011 Index Targets

Index	Current	2011YE index target			Up-/Down-side		
		Base	Bull	Bear	Base	Bull	Bear
MSCI China	67.6	94.5	111.5	73.2	39.8%	65%	8%
HSCEI	12,922	17,682	20,541	13,965	36.8%	59%	8%

China Strategy

We Are Optimistic on the 2011 Outlook for Chinese Equities

Introducing Our Year-End 2011 Index Targets

We see several positive themes: Mild inflation, normalized liquidity, modest tightening, good growth, strong currency, cheap valuation, humble relative performance in 2010, and mild consensus outlook.

- We set our new year-end 2011 index targets for MSCI China at 94.5 (up 15.7% from 81.7 for year-end 2010) and for HSCEI at 17,682 (up 14.8% from 15,399 for year-end 2010). These targets imply 40% and 37% upside potential, respectively.
- We project YoY earnings growth of 14.9% for MSCI China and 16.4% for HSCEI in 2011.
- We also expect P/E multiple expansion of 20%, to 15.7x on average from current market levels of 13.1x.

We favor high-beta, cheaply valued and deep cyclical industries:

These include banks, property, insurance, steel, cement and energy. We underweight all consumer sectors including durables, staples, auto and tech because we are not comfortable with their high valuation and high earnings expectations.

Loan quota is the key domestic risk and G3 growth is the key external risk:

We are using our economist's forecast of Rmb 7 trillion new loans in 2011. If the actual quota turns out to be much less than this, we expect that stocks would fall due to over-tightening. If economies in the developed world surprise on the upside and recover quickly in 2011, oil and food prices would rise globally, forcing China to tighten aggressively. In that scenario, stocks would fall.

Liquidity, Inflation and Policies: Not a Vicious Spiral

Liquidity, inflation and policies interact with each other, but we do not envision a vicious spiral that would derail growth, as China's money supply already decelerated in 2H2010.

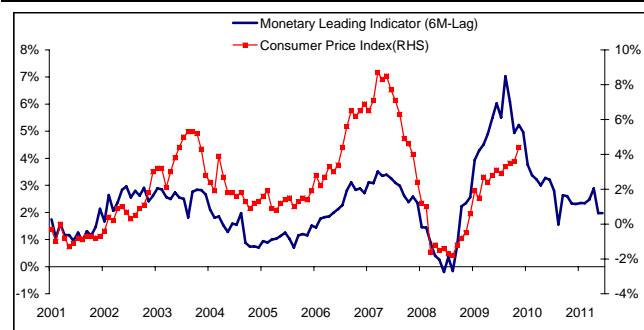

Indeed, our Greater China economist, Qing Wang, forecasts a new loan quota of Rmb 7 trillion and 4.5% inflation in 2010, with CPI peaking by the middle of the year. This is a very mild inflation picture for 2011, with good growth.

We, the strategy team, also see the possibility that CPI could peak even sooner in 1Q2011. Our monetary leading indicator (constructed by M1 and M2 information) shows clear

downward trend pressure on CPI in the coming months and for the full year 2011 – if we assume Rmb 7 trillion new loans to be allocated across the 12 months in 2011 in the same proportion as they have been in 2010.

Exhibit 1

Monetary Leading Indicator Implies Downward Trend of CPI in 2011: Assuming 7 Trillion New Loans

Source: CEIC, Morgan Stanley Research

Policy makers' change in tone has also confirmed this view:

At the regular Working Meeting of the Politburo that just concluded, the tone for 2011 fiscal policies was "appropriately accommodative" (same as 2010); monetary policies shifted to "stable and healthy" (from appropriately accommodative in 2010). This implies a balance between remaining pro-growth and tackling inflation risk.

Finally, Rmb7 trillion in new loans is a very loose level of liquidity to fuel growth. Indeed, it represents 16% of GDP in 2011, which is still well above the 13% "normal" new loans to GDP ratio before the financial crisis (2005~2007 average). Clearly, this would not derail growth.

In conclusion, we can build a bull case on our economist's inflation and liquidity view in 2011, as CPI peaking by 2011 will be good news for equities. If CPI actually peaks earlier than that, as suggested by our monetary leading indicator, then it could trigger market re-rating in the next few months.

Growth Expectations: Moderate, with Upside Risk

In the past 10 years, MSCI China's EPS growth has averaged 15.5% YoY, compared to current consensus forecast of 14.9% for 2011. We think there are upside risks in consensus earnings forecasts, especially in the large-cap groups such as banks and energy.

December 8, 2010

China Strategy

Exhibit 2

MSCI China Earnings Estimate Revision Trend

Source: IBES, MSCI, Morgan Stanley Research

The market is pricing in little expansion in banks' net interest margin next year. However, we think this implies earnings upside for the industry, since we envisage interest rate normalization next year. Assuming average NIM rebounds to the 2007 level of 3% (our analysts now expect just 2.4%), the big five banks would net about Rmb125bn extra after-tax profit on top of the current estimate of 620 bn. That would dramatically lift their 2011 earnings growth from 18.7% to 42.7% on average.

For the energy industry, every US\$1 rise in oil prices would also add roughly 1% to the oil companies' combined earnings growth in 2011 – currently the oil price assumed by our analysts is US\$95.

For other smaller industries such as capital goods, steel and cement, we believe the solid execution and delivery of social housing projects in 2011 (see Qing Wang's report *2011: A Year of Reflation*, Nov 22, 2010) could also prompt increased earnings estimates.

Valuation Attractive, Currency Should Support

MSCI China is trading at P/E multiples of 14.0x for 2010e and 12.2x for 2011e, based on consensus estimates. This is attractive compared to the historical average in the past decade of 13.8x FY1 PE. A 2011e P/E of 12.2x is also very close to half a standard deviation line below the long-term average – a historically strong support level. Also considering the humble performance of MSCI China in 2010 (up 4.3% year-to-date), we think that overall, the market's downside risk in 2011 should be very limited.

Exhibit 3

MSCI China Valuation Trend

Source: IBES, Morgan Stanley Research

The A-share market is trading at a discount to its H-share counterpart – which is very rare (only the third time in 10 years). This also suggests strong performance over the next 12 months in both the A-share and H-share markets.

Exhibit 4

A/H Premium vs. Market NTM Return

Source: Factset, Morgan Stanley Research

Our economist also believes that Rmb strengthening will continue in 2011 at an annualized rate of 6.5% (see Qing Wang's report *2011: A Year of Reflation*, November 22, 2010). Clearly this is not what the market is now pricing in (RMB 12-month NDF premium to spot rate is only 2.4% now). This implies strong re-rating potential in market valuation, given the close correlation between Rmb appreciation expectations and Chinese market valuation.

China Strategy

Exhibit 5

Rmb NDF Premium to Spot vs. Market Valuation

Source: Bloomberg, Morgan Stanley Research

From a relative performance perspective, we think it is also quite unlikely that MSCI China would underperform the regional market for a third consecutive year – unless fundamentals were exceptionally weak. Between 1993 and 1995, China underperformed AXJ for three consecutive years because the “Asian tigers” were booming amid an asset bubble, while China’s domestic economy suffered a hard landing after severe inflation and the bursting of an asset bubble in Hainan Island property.

Today’s relative fundamental outlook is exactly the opposite: China’s economic strength and corporate fundamentals are probably the strongest in the region, yet it has underperformed the region continuously for two years. We think a third year of such mispricing is highly unlikely against this fundamental backdrop.

Exhibit 6

MSCI China Relative Performance to MSCI AC AXJ

Source: MSCI, Morgan Stanley Research

Index Targets: 37% and 40% Upside

We set our new index targets for MSCI China and HSCEI at 94.5 and 17682, implying 40% and 37% upside respectively, mainly driven by 2011 earnings growth of 14.9% and 16.4% from 2010, and PE multiple expansion of 20% from current market levels.

Assuming real GDP growth of 9% in 2011, our model indicates a forward earnings multiple of 14.58x, based on the historical relationship between growth and valuation. Assuming 6.5% Rmb appreciation in 2011, our model indicates 19x, based on the historical relationship between Rmb appreciation and valuation. We believe the achievable market forward PE should settle between these two. We thus use the median, 16.79x, as the target multiple for 2011.

Asset Allocation Strategy: We Are Contrarians

Reviewing our 2010 asset allocation, we employed a low-beta strategy in 1H2010 and turned to a high-beta strategy since mid-2010.

Exhibit 10
China Model Portfolio Performance

MP performance is measured by weighted average return of its constituents; initial MP price is indexed at 100 on 11/30/2009; portfolio is rebalanced immediately after changes; assuming no currency hedging, no trading costs, and no dividends. Note: past performance is no guarantee of future results. Source: Factset, Morgan Stanley Research

We are carrying forward our high-beta strategy into 2011: We have a great focus on value, as we believe deep value and highly cyclical sectors can beat the market significantly throughout the process of re-rating.

Our favored industries are banks, properties, insurance, steel, cement and energy. We underweight transportation, auto, durables, staples, and technology.

Important US Regulatory Disclosures on Subject Companies

As of October 29, 2010, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Angang Steel Company Limited, Bank of China Limited, China Life Insurance, China National Building Material Company, China Overseas Land & Inv., China Petroleum & Chemical Corp., China Resources Land, China Shanshui Cement Group, China Telecom, China Vanke Co., Ltd., Netease.com, PetroChina, Ping An Insurance Company, Sohu.com Inc, Yantai Changyu Pioneer Wine Company Ltd..

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of China Mobile Limited, China National Building Material Company, KWG Property Holding Limited, Ping An Insurance Company.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from China National Building Material Company, Industrial and Commercial Bank of China, KWG Property Holding Limited, PetroChina.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Air China Limited, Angang Steel Company Limited, Bank of China Limited, China Construction Bank Corp., China Foods Limited, China Life Insurance, China Mobile Limited, China National Building Material Company, China Overseas Land & Inv., China Petroleum & Chemical Corp., China Resources Land, China Shenhua Energy, China Telecom, Industrial and Commercial Bank of China, KWG Property Holding Limited, Netease.com, Parkson Retail Group Limited, PetroChina, Ping An Insurance Company.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Air China Limited, Bank of China Limited, Bank of Communications, China Construction Bank Corp., China Everbright International Limited, China Life Insurance, China Petroleum & Chemical Corp., Industrial and Commercial Bank of China, PetroChina, Ping An Insurance Company.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Air China Limited, Angang Steel Company Limited, Bank of China Limited, China Construction Bank Corp., China Foods Limited, China Life Insurance, China Mobile Limited, China National Building Material Company, China Overseas Land & Inv., China Petroleum & Chemical Corp., China Resources Land, China Shenhua Energy, China Telecom, Industrial and Commercial Bank of China, KWG Property Holding Limited, Netease.com, Parkson Retail Group Limited, PetroChina, Ping An Insurance Company.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Air China Limited, Bank of China Limited, Bank of Communications, China Construction Bank Corp., China Dongxiang Group Co. Ltd, China Everbright International Limited, China Foods Limited, China Life Insurance, China National Building Material Company, China Petroleum & Chemical Corp., China Southern Airlines, China Unicom, Industrial and Commercial Bank of China, KWG Property Holding Limited, Netease.com, PetroChina, Ping An Insurance Company, VisionChina Media.

An employee, director or consultant of Morgan Stanley (not a research analyst or a member of a research analyst's household) is a director of China Dongxiang Group Co. Ltd, China Shanshui Cement Group.

Morgan Stanley & Co. Incorporated makes a market in the securities of Giant Interactive, Netease.com, Sohu.com Inc, VisionChina Media.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity and specialized trading, risk arbitrage and other proprietary trading, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below).

Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of November 30, 2010)

For disclosure purposes only (in accordance with NASD and NYSE requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)		
	Count	% of Total	Count	% of Total IBC	% of Rating Category
Overweight/Buy	1121	40%	417	44%	37%
Equal-weight/Hold	1175	42%	410	43%	35%
Not-Rated/Hold	119	4%	26	3%	22%
Underweight/Sell	392	14%	105	11%	27%
Total	2,807		958		

Data include common stock and ADRs currently assigned ratings. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months.

Analyst Stock Ratings

Overweight (O or Over) - The stock's total return is expected to exceed the total return of the relevant country MSCI Index, on a risk-adjusted basis over the next 12-18 months.

Equal-weight (E or Equal) - The stock's total return is expected to be in line with the total return of the relevant country MSCI Index, on a risk-adjusted basis over the next 12-18 months.

Not-Rated (NR) - Currently the analyst does not have adequate conviction about the stock's total return relative to the relevant country MSCI Index on a risk-adjusted basis, over the next 12-18 months.

Underweight (U or Under) - The stock's total return is expected to be below the total return of the relevant country MSCI Index, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Client Link at www.morganstanley.com.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of a particular investment or strategy will depend on an investor's individual circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them.

The fixed income research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The "Important US Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.
